

Hands-On Working with Data

You can use all class notes, readings, exercises, homework, peers, and the internet to help you.

1. Create an html R Markdown file
2. Name .Rmd “Selecting_Filtering_and_Summarizing”
3. Save it in your organized directory structure
4. Assign `ggplot2::diamonds` to a data frame
5. Practice
 - a. Selecting variables
 - b. Filtering variables in different ways (e.g., by character, number, etc.)
 - c. Grouping data by variables and summarizing the data in different ways
6. Save and Knit it
